Discontinued/replaced Delica Beads

August 2023

Dear Stitcher,

To become more eco-friendly, Miyuki (manufacturer of Delica beads) have decided to stop using pigments containing lead which have been used for some of their glass enamel beads and switch to a lead-free version. For the beads that are being replaced in this way, see List 1 'New colour numbers' below. Unfortunately, Miyuki have not been able to create a direct replacements for all of the beads and these are shown in List 2 'Discontinued beads' below.

If any further information becomes available, this document will be updated.
